

CRSSP USDA Discussions

November 17, 2004

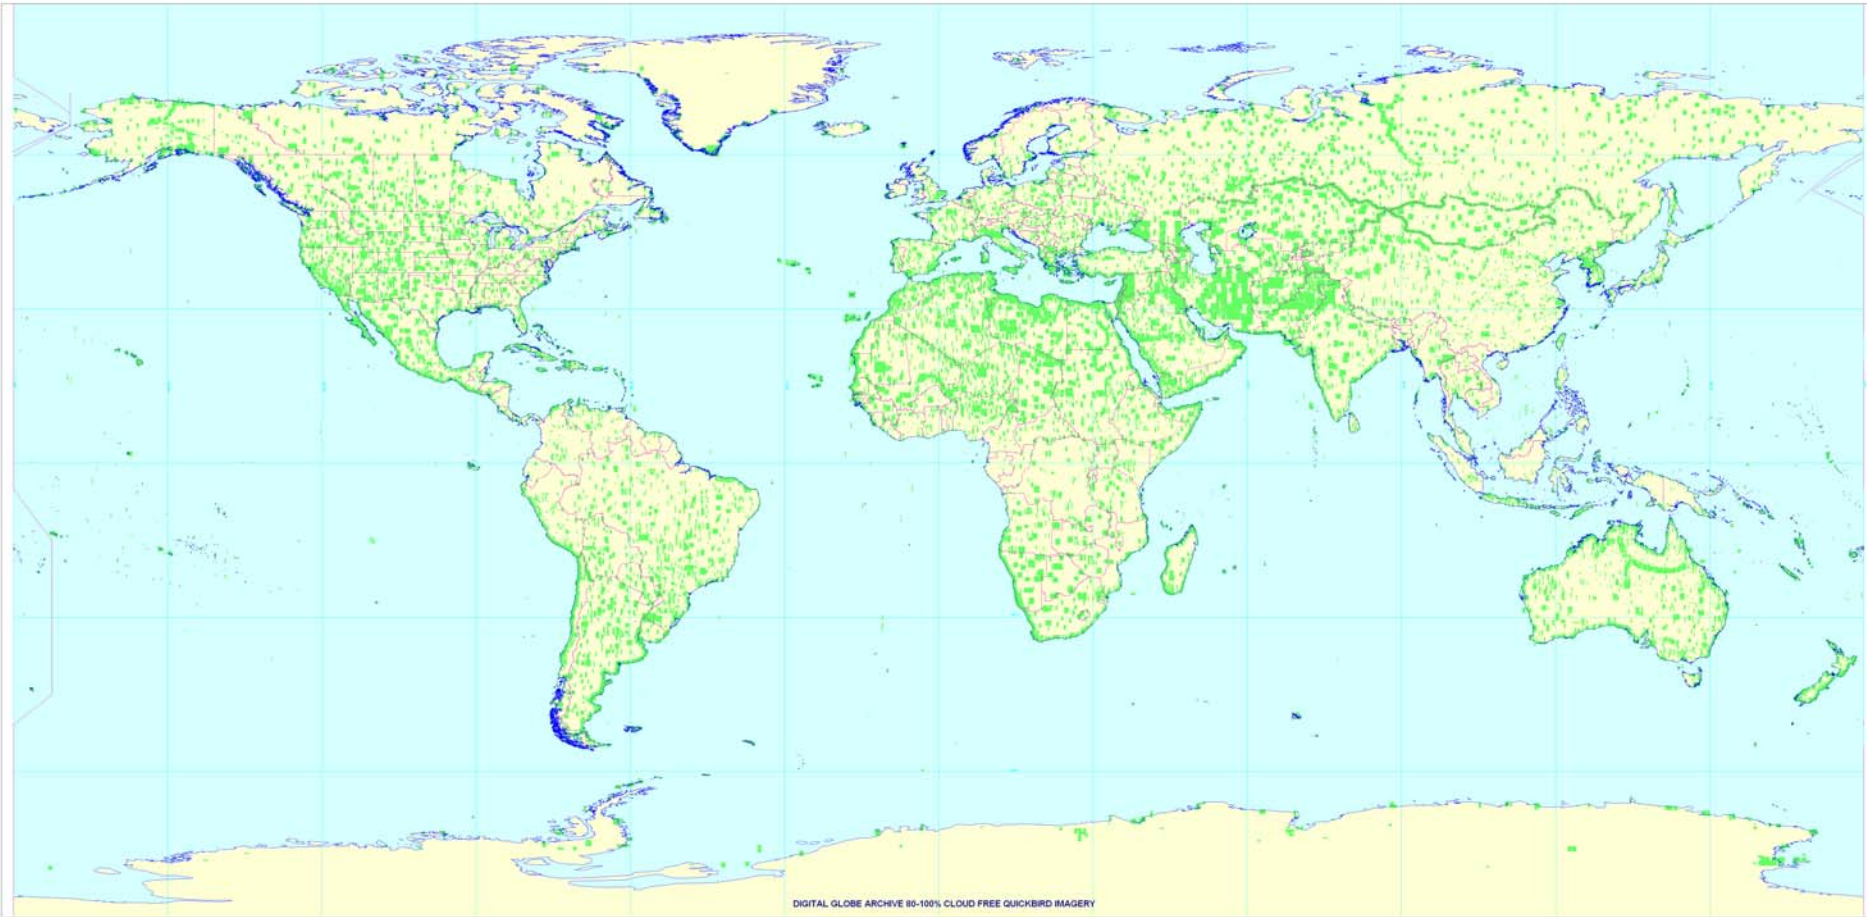

Space Imaging Holdings

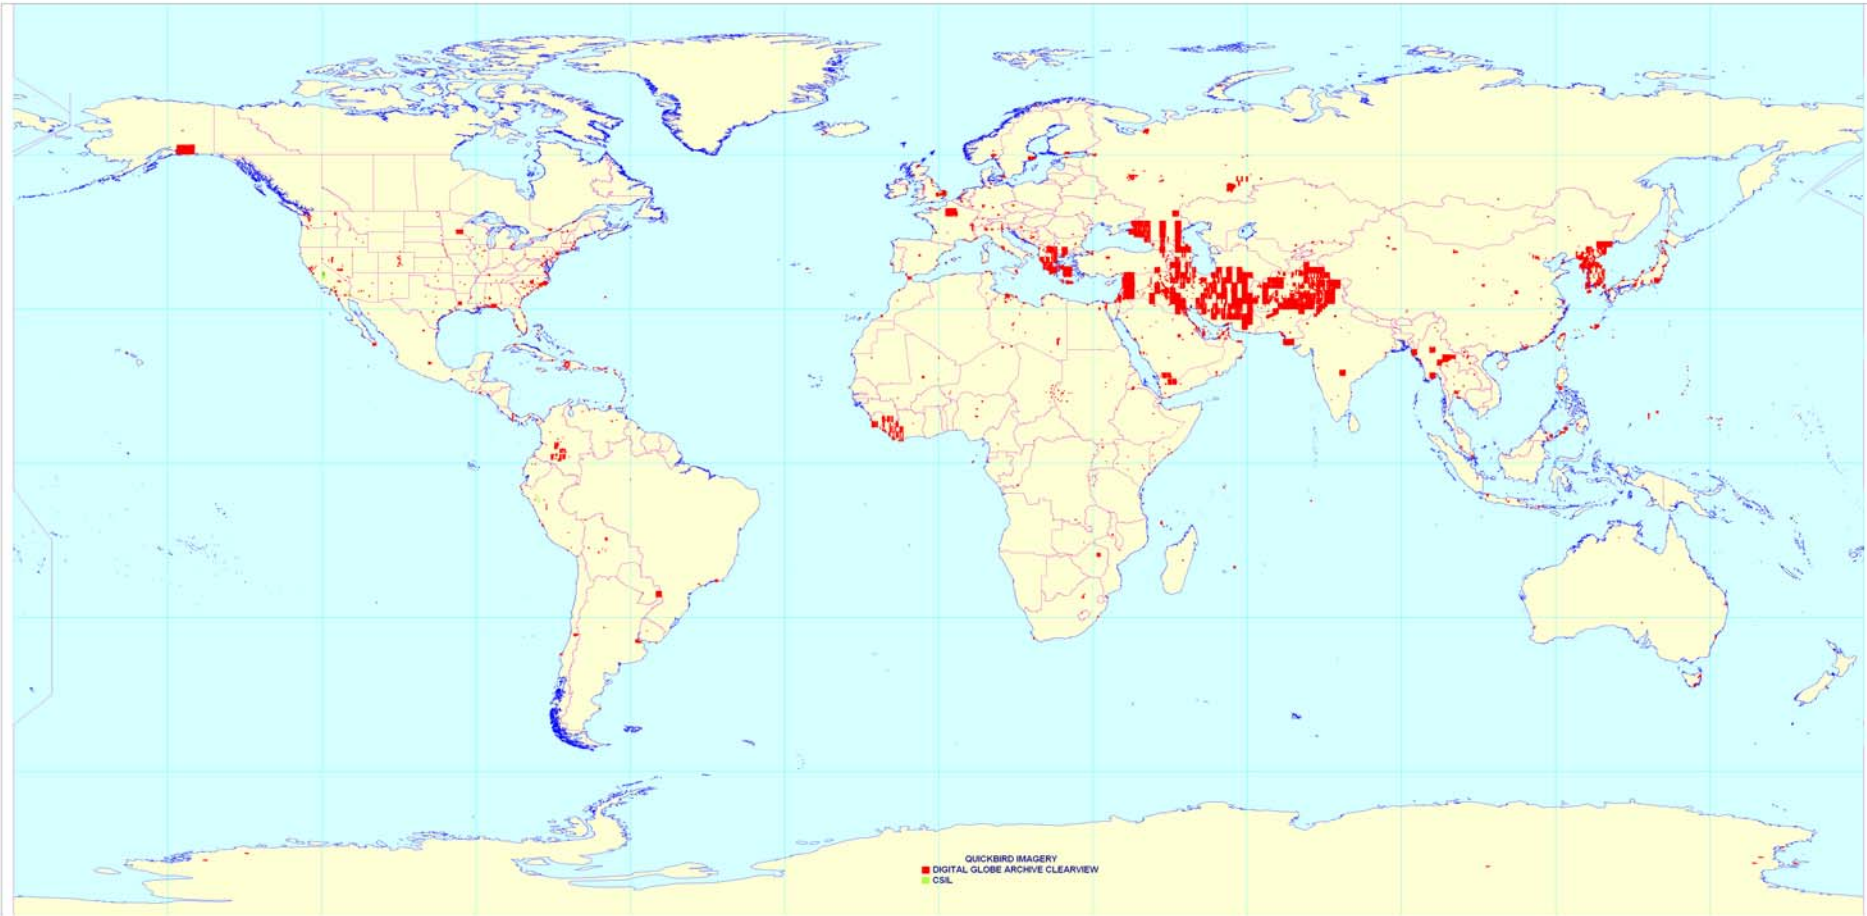

Space Imaging NGA Holdings

Digital Globe Holdings

Digital Globe NGA Holdings

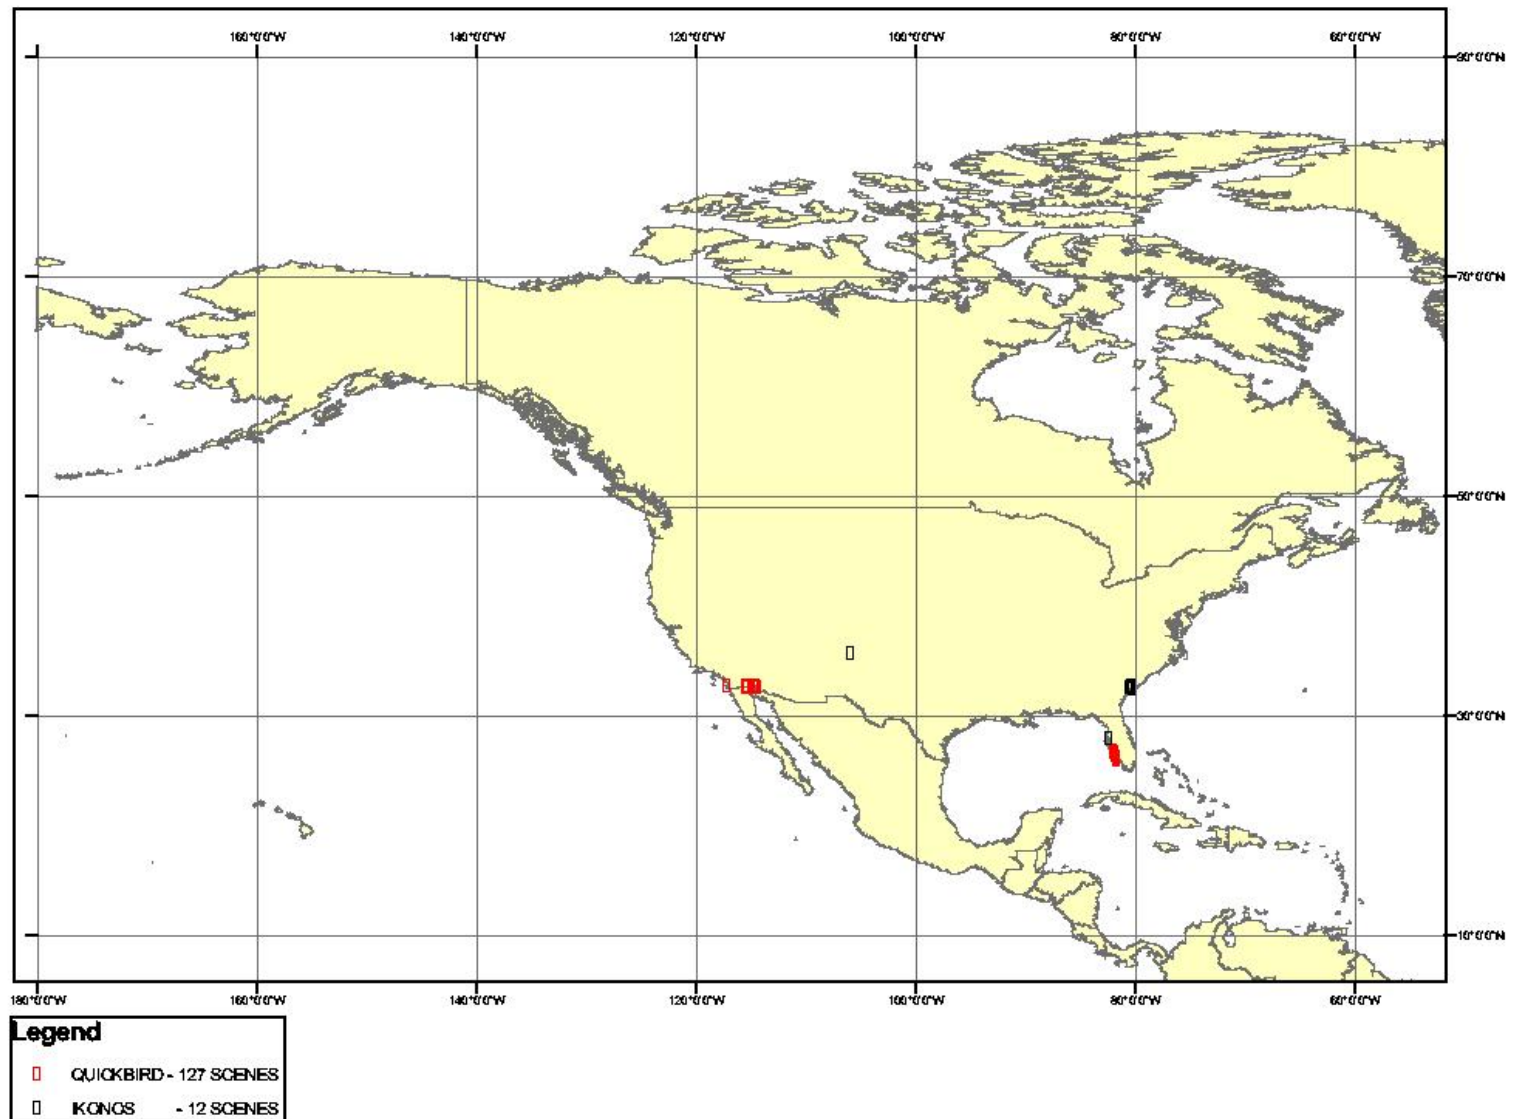

Current Data Transfer Process

- The USGS has had a SMO designated
 - Recently received another SMO for international orders
- CRSSP has placed around seven imagery orders through the SMOs
- Orders are then shipped on media
 - All orders were received generally within a 5-day window

Future Data Transfer Process

- NGA has investigated writing applicable data to firewire and shipping to USGS
 - Firewire must be new
 - Will need 20 - 22 firewire to accommodate U.S. holdings
 - Need to define what to transfer for international holdings
- Capability will be available in March to have standing orders, where data will be shipped automatically on NGA receipt.

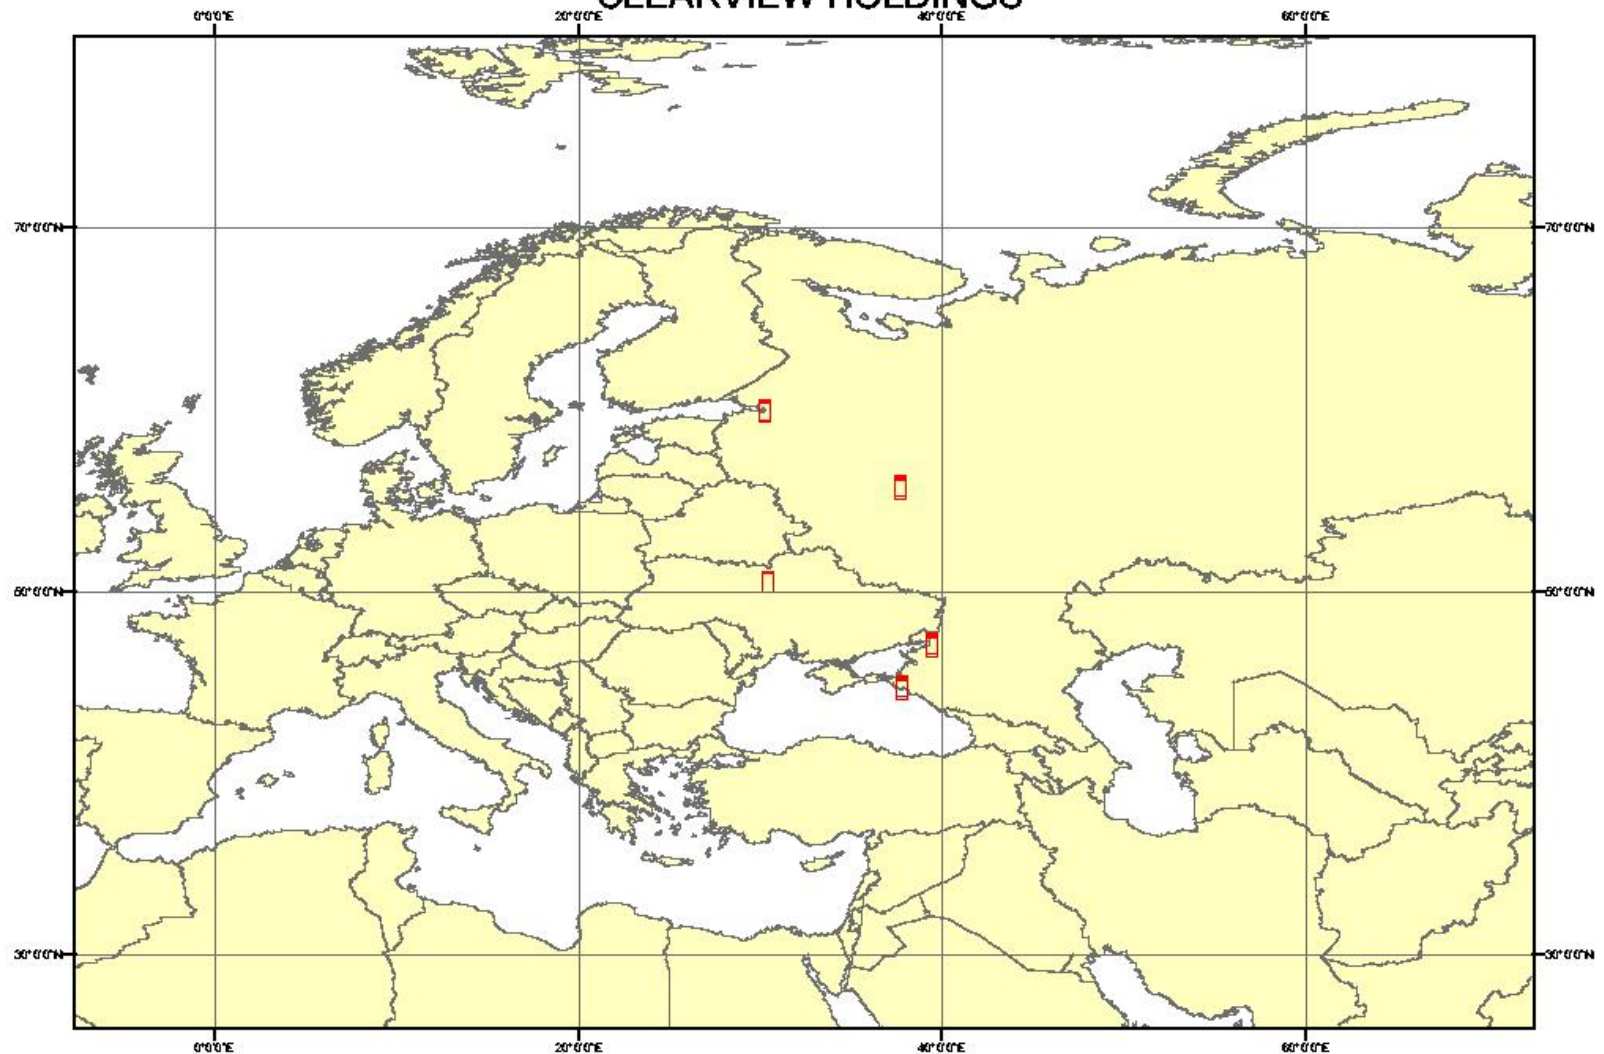

CRSSP IKONOS & QUICKBIRD CLEARVIEW HOLDINGS

International Orders

- We have a different SMO for international orders
 - Needed to redefine process for NGA ordering
- International Port data
 - Placed an order for the first 10 ports
 - Of those, 6 had available data
 - Received 5 of those this week (the 6th was DoD licensed).

CRSSP IKONOS & QUICKBIRD CLEARVIEW HOLDINGS

Legend	
	QUICKBIRD - 127 SCENES
	IKONOS - 12 SCENES

NITF Conversion

- Have currently evaluated:
 - PCI
 - OpenEV
 - ERDAS
- Also plan to evaluate GDAL
- Do not plan to address standard format for distribution/archive until future infrastructure release
